Chris Bath
CEO

Norgine is inspired by patients, and our mission is to provide access to transformative medicines which may otherwise never reach the people who need them. We have been transforming patient lives for over 100 years and we are proud to be able to help a growing number of patients worldwide every year. The Norgine Business Code establishes the framework for achieving our vision of providing innovative healthcare solutions that transform lives.

High standards of ethical conduct and trust are key components of this framework and are integral to all our relationships, starting with the patients themselves and extending to all our partners with whom we engage.

The Norgine Business Code and related policies require the active commitment of all Norgine employees as well as those acting on our behalf or doing business with Norgine. We are all responsible for understanding and adhering to the Norgine Business Code and upholding Norgine's values. It is the **One Norgine** approach and, quite simply, *it is the right thing to do.*

Not every situation is addressed in the Norgine Business Code. If you are uncertain or need guidance, it is important to **Speak Up** and raise your questions, concerns, or suggestions through any of the mechanisms available. Your engagement is critical to our continuing success.
